

Each function of the Lynx software uses a server seat. One computer can use 1, 2 or even 3 server seats. If a computer only uses the LynxKey or LynxKeyPro that would use one server seat. If they also used the LynxMessenger and the LynxIcons that would use 3 server seats. In addition to the server seats there are Premium Licenses LynxKeyPro, LynxMessengerPro and LynxIconPro that have an additional cost per computer.

LynxKey - (F9-F11) Logged on only.

No additional cost, uses a server seat. Operates with Windows and Thin Clients

LynxKeyPro - (F9-F11) Operates Logged on, Logged off, Locked

Uses a server seat. Operates with Windows

Emergency Notification
Windows/Mac LynxIcons

The supervised, **LynxIcons** are a very powerful solution for discreet, instant security or supervisor assistance.

Additional information can be added when an Icon is activated by the user. Location information of the **PC or Mac** can be included in the alarm message.

The secure, pre-configured **LynxIconPro** are used for Emergency Management to speed up and simplify notification while they are mobile using the **LynxIconPro** mobile web page. Must be able to reach the LynxGuide server via Wi-Fi or VPN.

LynxKeyPro F9-F11 PC based Duress

- **Works Logged on, Logged off or locked**
- Supervised for employee and system awareness
- Monthly Employee Test - Reports, Training and Confirmation
- Up to 3 Unique key combinations for different issues
- Over 500,000 in use

The **LynxKey** client software function provides a 2 key combination keyboard duress alarm, that allows users to send messages from a PC or VDI when the user is logged on. The LynxKey Client has supervision and monthly test. Many VDI environments are supported, such as Citrix XenDesktop and VMWare Horizon. Keyboard labels not included.

The LynxMessenger Popup

- On Windows PCs the message can be whole screen, medium, corner (100%, 70%, 30% of screen size) or scroll.
- The popup can include images and RTSP IP Cameras.
- The Popup can include text to speech.
- On Macs the popup message is whole screen and can include images and RTSP IP Cameras. Logged on only operation

LynxMessengerPro are text only enabling the Popup alerts to occur on Windows PCs **when they are logged on, logged off or locked** (the PC must be powered on). Compatible with Windows Vista, 7, 8, and 10.
