

LynxKeyPro

SKU #950-LYNX-KEYPRO

LynxKeyPro allows a PC to send an alarm to the LynxGuide server when the PC is Logged On, Logged Off or Locked. The user presses 2 keys on the keyboard, such as F9+F11 (3 keyboard combinations supported, 20 combinations to select from). 25 LynxKeyPro licenses, 50 keyboard labels and 25 CPU labels included.

Features and Benefits

- Windows keyboard duress when Logged on, Logged off or Locked
- Monthly Employee Test
- Supervised by the LynxGuide Server

Communication Protocol: The LynxNet hardware and Lynx Client software achieves bidirectional communication through a client-initiated, persistent socket session to the LynxGuide server on ports 10117-10121. No network ingress connections are required. All server communications are TLS encrypted. In addition to providing security, this method is ideal if the hardware is behind a gateway, as no NAT rules are required to achieve connectivity.
